**DETAILED ACTION**

***Response to Arguments***

Applicant's arguments with respect to claims 1-4, 6-24, 26-41 have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4, 6-24, 26-41 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent 6487646 to Adams et al.(hereinafter Adams).

Regarding Claim 1, Adams discloses a hardware secure module having a tamper resistant module structure and storing that-information related to secure software,

a memory that stores the secure software see Fig.2 item 61;

a falsification Checking unit that is loaded on the hardware secure module, wherein the falsification checking unit reads the secure software from the memory by direct access without using an operation system, compares the secure software with the first-information in the hardware secure module, and checks whether the secure software is

falsified based on a result of the comparison see Fig. 5 item 150, 152;  
and

a processor that executes secure software when a result of the check by the falsification checking unit is that the-secure software is not falsified see Fig. 5 item 154 & Col 5 Ln4-11.

Regarding Claim 2-4, 6, 22-24, 26, Adams discloses the second information being read in parts from each hard drive and non-volatile memory and further of comparing of the information see Col 6 Ln 51-59

Regarding Claim 7-12, 27-32, Adams disclose the storing and updating of settings see Col 3 Ln 45-60.

Regarding Claim 13-18, 33-38, Adams does not explicitly disclose the keys and secret information being used to store and encrypt the data see Col 4 Ln 57-65.

Regarding Claim 19, 39, Adams discloses the MPEG configuration see Col 3 Ln 39-45.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
